

## mosquito® classic Insect Protection Spray

**Keeps mosquitoes, ticks and grass mites at bay - from one year onwards.**

mosquito® Insect Protection Spray offers you up to 5 hours of protection from mosquitoes, horseflies, ticks and grass mites.

mosquito® Insect Protection Spray contains p-Menthane-3.8-diol, which is produced from the extract of the lemon eucalyptus tree.

mosquito® Insect Protection Spray is suitable for children aged 12 months or older.

### Active ingredient

20g/100g p-Menthane-3.8-diol

### Instructions for use

Shake the spray before use. Apply the spray evenly to all parts of the skin to be protected and then spread with the hand, remembering to include any skin areas covered with thin fabric. To apply to the face, first spray onto the palm of your hand. Avoid the eyes and mouth. If you use a sun creme, only apply the Insect Protection Spray after applying the creme. The spray can be reapplied as its effects begin to wear off, e.g. due to heavy perspiration.

### Dosage / application amount

1g / 600 cm<sup>2</sup> (5-7 spray jets on each arm for adults).

### Pregnancy or breastfeeding

No sufficient information is available that contraindicates use during pregnancy or when breastfeeding. Before breastfeeding, make sure to wash treated parts of the body.

### Caution

- Liquid and vapor are flammable.
- The product is designed solely for external use and should not be ingested or inhaled. If the product is ingested, seek medical attention or contact the poisons center.
- Avoid contact with the eyes - causes severe eye irritation.
- Do not apply to injured or damaged skin (e.g. sun burn).
- Keep the product out of reach of children.
- Contains perfume and can cause allergic reactions.
- If the skin reacts, stop using and seek advice from a doctor.
- Do not eat, drink or smoke while applying the spray.
- Wash your hands thoroughly after use.
- Protect from heat, cold and direct sunlight.
- Empty containers should be sent for recycling.
- The active ingredient can damage plastics, synthetic materials and painted surfaces.
- Only use in well-ventilated areas; avoid inhaling the spray.
- Not suitable for breastfeeding children. Use sparingly on children 12 months or older.

Use mosquito® repellent spray with care. Always read label and product information before use.
