

mosquito® protect Mosquito Protection Spray

Effectively keeps mosquitoes at bay - long-term protection for up to 6 hours.

mosquito® Mosquito Protection Spray offers you up to 6 hours of protection from native and tropical mosquitoes. It also keeps horse flies and ticks at bay. mosquito® Mosquito Protection Spray contains no alcohol and is suitable for children aged 2 years and upwards.

Active ingredient

20g/100g Icaridin.

Instructions for use

Apply the spray evenly to all parts of the skin to be protected and then spread with the hand, remembering to include any skin areas covered with thin fabric. To apply to the face, first spray onto the palm of your hand. Avoid the eyes and mouth. If you use a sun creme, only apply the Mosquito Protection Spray after applying the creme. The spray can be reapplied as its effects begin to wear off.

Dosage / application amount

1g / 600 cm² (5-7 spray jets on each arm for adults)

Pregnancy or breastfeeding

No sufficient information is available that contraindicates use during pregnancy or when breastfeeding.

Caution

- The product is designed solely for external use and should not be ingested.
- Avoid contact with the eyes and mucous membranes; rinse any affected areas with plenty of water and seek medical attention.
- Do not apply to injured or damaged skin (e.g. sun burn).
- Keep the product out of reach of children.
- Protect from heat, cold and direct sunlight.
- Empty containers should be sent for recycling.

Use mosquito® repellent spray with care.

Always read label and product information before use.
